## EXPERIENCE

### Volla — *blockchain developer*

December 2022 - April 2023

During my tenure at Volla, I assumed the position of a Blockchain Wallet Developer, leading the development of a sophisticated blockchain payment wallet. In this capacity, I played a pivotal role in crafting intuitive user interfaces for the wallet application, ensuring seamless user experiences. Additionally, I spearheaded the creation of robust smart contracts, guaranteeing secure and efficient transactions on the blockchain network.

### Faynd — *Frontend developer*

April 2023 - February 2024

As a Web Application Developer at Faynd, my primary focus was on designing and developing web applications using React.js. I collaborated with the product team, implemented UI/UX designs, integrated APIs, conducted rigorous testing, and optimized performance. Additionally, I successfully deployed an application to production, overseeing the entire process from development to deployment as a part of my responsibilities.

### Freelancing — *Fullstack developer*

February 2024 - PRESENT

I adeptly design and develop web pages using React.js, HTML, CSS, and JavaScript, while collaborating effectively with team members on web application projects. My focus is on writing clean and maintainable code, ensuring compatibility across browsers and devices through thorough testing. I stay updated on emerging technologies and work closely with project managers to deliver projects on time and within budget.

## PROJECTS

### Some of my projects

- [Doxxer](#) – this is a website where users can verify a web3 project is doxxed or not.
- [Bruhbird](#) – this is fun game flappy bird like game I created with html and css.
- [DLotto](#) – a decentralized lottery system on polygon mainnet.
